

Remove the Kiosk,
Raise Your Compliance.

SEC³URE GO!

Your kiosk helps you to enforce visitor compliance, but if the printer goes offline or runs out of paper, it's impossible to keep up. And when visitors get delayed, they may be tempted to skip the process altogether to make an appointment on time. Starting today, you won't need the kiosk anymore.

We've built our newest innovation, **SEC³URE GO!**, to make visiting your facility easier than ever. And because every visitor is checked-in and compliant the minute they arrive onsite, with no need to visit a kiosk or wait in line – you'll see an immediate increase in the level of your compliance.

SEC³URE GO! raises the level of your facility's compliance because every visitor is checked in and trusted the moment they arrive onsite.

Your facility is 100% compliant when your check-in process is automatic:

- + There's no hardware to troubleshoot or network connections to maintain.
- + Visitors are checked-in and cleared to be onsite upon arrival, elevating your facility's compliance.
- + **SEC³URE GO!** is a consistent visual for all visitors so you know who's trusted and who's not.

SEC³URE GO!

helps your facility's employees identify who is on site, who they are visiting and if they are verified to be there.

SEC³URE GO! is exclusively available on the SEC³URE Ethos technology platform, which provides your facility with industry leading innovations that are built to use trust to help you provide the highest quality of care to your community.

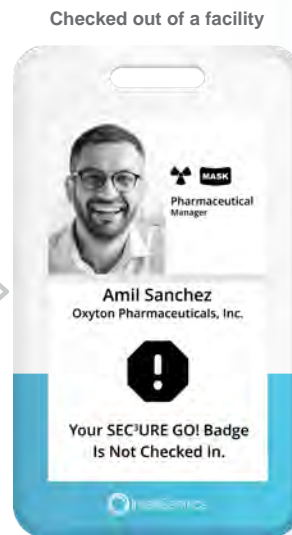

Everyone wins with IntelliCentrics.
