

SEC³URE Link

Elevate credentials to the level of *trust*.

The **SEC³URE Link** technology ensures only trusted stakeholders can be scheduled to be onsite at a facility.

By integrating their credential requirements with the scheduling process, facilities are able to schedule only those individuals they **trust**.

This includes practitioners, physicians, allied nurses and vendor representatives visiting your location of care organized by cases, procedures or business meetings.

Schedule trusted individuals only:

- + Select a meeting type such as case, procedure or business meeting.
- + Select everyone you want to invite; you control who's essential and who's not.
- + We do the rest and ensure everyone scheduled is compliant & trusted before the appointment.

With SEC³URE Link:

- + Everyone onsite is always trusted.
- + You can configure meeting preferences for all participant types.
- + You'll always know when individuals are coming and where they are going.

For the OR, **SEC³URE Link** results in a well orchestrated process where everyone is always on the same page

- Each procedure is perfectly coordinated the moment it is scheduled
- Have visibility into the cost of each procedure down to tray pricing
- Reimbursements are protected because everyone is trusted

With IntelliCentrics, everyone wins.
