

Surgery Centers in the SEC³URE Ethos

Credential, privilege, staff and
schedule in the SEC³URE Ethos

Managing a surgery center is one of the toughest jobs in healthcare.

There is not enough time in your day to oversee procedure scheduling, credentialing, and staffing contractors while keeping an eye on patient care.

Life in the SEC³URE Ethos means you'll have time to get more done while credentialing and privileging faster. And by fast, we mean minutes not months.

How it Works:

- + You give us your policies, by-laws and agency partner lists
- + We'll credential and verify all your contractors, vendor reps, agencies and medical staff
- + Our customer support Heroes do the work, while you keep total control

Your Life in the SEC³URE Ethos:

- + You'll have more time to focus on schedule optimization and patient outcomes
- + You'll know that everyone scheduled for a case is always trusted and compliant
- + You'll only need to manage exceptions because we're monitoring sanctions and expirables

With **SEC³URE Link** you'll schedule procedures, manage trays and preference cards and communicate with everyone in one place. This means less manual work, centralized processes and more revenue.

We've got your back
Your IntelliCentrics Hero is always working behind the scenes to support you and keep you audit ready.

With IntelliCentrics, everyone wins.
