

Supply Chain in the **SEC³URE Ethos**

Vendor representatives trusted,
every visit, every day.

Elevate vendor representative compliance.

Vendor representatives are essential to hospital efficiency but maintaining control and ensuring their compliance can be exhausting.

We created the **SEC³URE Ethos** to make vendor management easy. By removing the need for kiosks and giving you the technology and support you need, you have greater compliance and control of your vendor population.

Life in the **SEC³URE Ethos** means compliance and trust are technology driven and costs are lower because facilities and reps have the tools they need to do their jobs more efficiently.

Here's how it works:

- + Everyone is trusted and verified that they meet your credentialing requirements
- + **SEC³URE Link** technology means if a vendor is not trusted, they cannot be onsite
- + Our customer support Heroes monitor your facility and partner with you regularly to optimize your controls

Here's what life in the Ethos looks like for you:

- + You get 100% vendor rep compliance because our technology and Heroes ensure that everyone is trusted before they visit
- + You don't have to deal with kiosk maintenance – no paper or tech support which means lower costs and better efficiency
- + Your reimbursements are safeguarded because everyone is trusted

SEC³URE Link, technology elevates your credentials to trusted:

- Meeting preferences are fully customizable
- Everyone scheduled is trusted
- There are no surprises, you know who is coming, when they will be there and where they will be

With IntelliCentrics, everyone wins.
