

# NEXT-LEVEL COMPLIANCE **COVID-19 CREDENTIAL**

---

**With the  
Flexibility  
to Realize  
Needs of  
the Future**

## **A CREDENTIAL TO MEET TODAY'S COMPLEX NEEDS**

---

COVID is not yet an endemic disease. In other words, it is not yet found commonly among us. COVID-19 is still currently in a pandemic disease state, where we have seen an acute rise of cases. However, signs are pointing towards transitioning from a pandemic to an endemic disease state. The expectation that COVID-19 will become endemic essentially means that the pandemic will not end with the virus disappearing; instead, enough people will gain immune protection from vaccination and from natural infection such that there will be less transmission and much less COVID-19-related hospitalization and death, even as the virus continues to circulate.

IntelliCentrics' COVID-19 credential provides healthcare facilities with a trusted solution for their unique policies. It is a total solution that meets your compliance objectives while simultaneously considering every individual's unique circumstances when interacting with your facilities.

## EXPERIENCE MATTERS

Our platform, the SEC<sup>3</sup>URE Ethos, not only makes compliance easy and portable but also monitors over 1,000 points of risk daily to ensure everyone's compliance keeps up with policy updates. We have processed 40 million pages of credentials since we started our business – more credentials than the top 100 healthcare systems in the world combined. All of the data stays safe within the SEC<sup>3</sup>URE Ethos, regardless of the volume or scale of our work. We invest in technology, not mergers and acquisitions, to protect user data and grow our customer base.

As a total solution, IntelliCentrics' COVID-19 credential delivers the configurability to meet the latest CDC regulations and even the most complex state mandates based on your policies and procedures. Built with tools and insight to ease the administrative burden of the seemingly endless different options needed to meet your facilities' COVID-19 compliance needs.

**If you are a healthcare facility currently using the SEC<sup>3</sup>URE Ethos platform and would like to help develop a COVID-19 credential, contact a customer support Hero today:**

## YOU ARE IN CONTROL

A total solution includes world-class customer service. Your customer service Hero is ready to support you and your policies every step of the way. The best place to begin when considering policy changes and safe alternatives to managing COVID-19 compliance is looking at community best practices. You can take comfort knowing that the 11,000+ healthcare facilities on our platform are all asking the same questions. You are always in control with IntelliCentrics. Our role is to ensure the entire community follows your policies when interacting with your facilities.

## EVERYONE WINS

The SEC<sup>3</sup>URE Ethos is built on the idea that everyone wins when interactions can be trusted across the complex spectrum of care. This includes interactions between doctors and patients, doctors and facilities, and facilities and vendors. We don't influence any of the interactions. Only facilities can set their policies. Our job is to make sure subscribers accept the policies and meet the credential requirements. We reinforce our commitment to being the industry's only fully integrated, end-to-end solution that allows facilities to trust everyone – from the waiting room to the board room – based on their existing policies.
